Ellipse Sirius Intense Pulse Light Treatment

Intense Pulse Light can be used for a variety of treatments including hair removal, skin rejuvenation, thread veins, skin discoloration (age spots), pigmentation, freckles, acne and rosacea. We can treat diffused redness of the skin due to flushing and acne rosacea.

The Ellipse Sirius offers a unique Selected Waveband Technology which is a narrowband spectrum of light which is emitted over the surface of the skin to achieve variable treatment solutions, technology that is clinically renowned for pushing boundaries in dermatological genius.

Hair Removal

IPL (Intense Pulsed Light) works by shots of light travelling down the hair follicle, then the melanin in your skin converts the light into heat, which destroys the hair at the root, starting the process of hair growth prevention.

As hair grows in cycles, one treatment will not be sufficient in significantly reducing hair growth, so a minimum of 6 sessions are recommended to see the best possible results. We do offer a course price.

Price Per Treatment:

Upper Lip **£50** Bikini Line from **£75**
Chin **£50** ½ Leg **£150**
Chin & Lip **£85** Full leg **£265**
